

DARREN LEE

ARTIST STATEMENT

As a New York City native I've seen a lot of out of the ordinary things. Being the firm believer that everything happens for a reason and that there has to be a deeper meaning to seemingly random stuff is exciting and fun as I piece together a connection. That's how I approach my work and would like others to view my work, whether it be in printmaking or currently on the Internet.

Interactivity on the web brings another layer to my process where puzzles are to be solved both from the clicking on a button to the use of the imagination. My next project involves karaoke with news feeds for a spectacular installation bringing together my love of seemingly entertaining randomness and the mundane. Look out for it in the Spring 2009.
